

Distech Controls Enterprise Solutions

Discover our Elevated Enterprise-Level Solutions

Are you a multi-site enterprise?

For regional, national, and international enterprise customers, DCES partners with our global System Integrator (SI) network to provide the latest open building technologies with the industry's most flexible delivery model.

Our enterprise portfolio includes over 400+ retail and commercial offices within the United States and Canada. We have successfully installed building automation controls in critical facilities across 2 continents, 4 countries, and in 3 languages, for the control of over 20M square feet of built space.

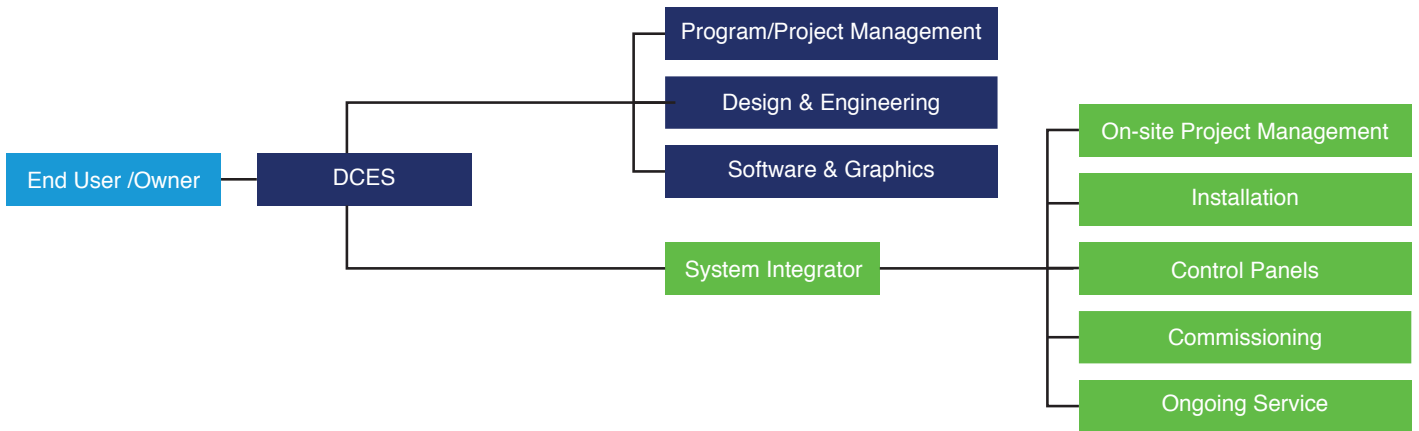

How do we do this?

We team up with our **SI network** to provide turnkey projects around the world that:

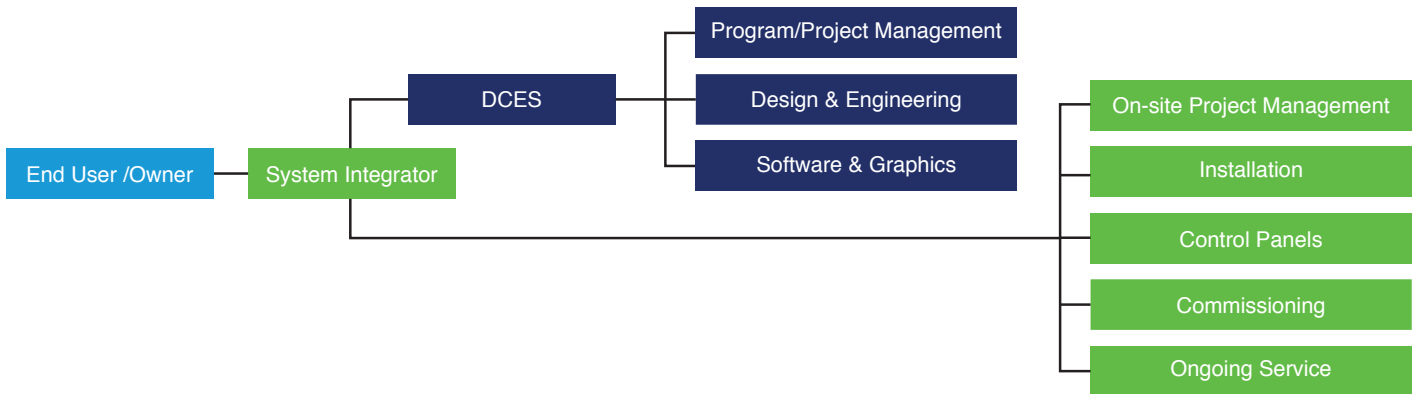

- Are **scalable and flexible** by application and customer location.
- **Provide consistency** in solution and delivery, from GUI development to engineering design services and system software development.
- Leverage Distech Controls' SI network for **rapid expansion into multiple regions**, while maintaining standards and repeatability
- Ideal for applications such as **commercial offices, data centers, government, healthcare, and retail**
